Surname: Radebe

Student number: 11863244

Module: BPT1501

Assignment 2

Mind map

Challenges identified

- A culture of disengagement, low expectation and what seems like a pervasive resignation.
- They are misusing the funds that the school receives.
- The infrastructure is in state of neglect, classrooms and walls are covered in graffiti and there is a palpable sense that the school has been allowed to deteriorate slowly.
- Classroom teachers only attend lessons for a short period of time and no teacher wants to take accountability.
- They have normalized teenage pregnancy and they are no support session for many victims of pregnancy because there is no access to sexual educational and stable guidance.

Impact on the classroom management

- Lack of resources in schools is extremely detrimental to the students learning and the teachers instructing the class.
- If the school lack basic facilities to support learning, it may results to lower academic performance.
- It is important to educate learners about sexual health to reduce the risk of sexual behavior.
- If educators do not attend their lessons regularly it may result in limited opportunities for learners to engage in meaningful learning experiences.
- They normalized teenage pregnancy so it may result in statistic of teenage pregnancy increasing yearly.

Solutions to resolve identified challenges

To deal with culture disengagement encourage realistic flexible working options and the wellbeing of the workers

Emphasize the importance of the policy for the educators to understand accountability of the classroom

They should set a realistic budget for unnecessary expenditure

Introduce simple classroom management system & experiment with interactive methods that encourage participation

Encourage educators to have consistent professionalism, preparedness & pride among themselves & their knowledge

They should develop health awareness classes weekly so leaners can always have a solid foundation in taking health precautions.

Instead of normalizing teenage pregnancy they should normalize teaching learners about safe sex.
